RESEARCH ARTICLES

Rosenbaum HC, Clapham PJ, Allen J, Nicole-Jenner M, Jenner C, Florez-González L, Urbán JR, Ladrón PG, Mori K, Yamaguchi M, Baker CS
Geographic variation in ventral fluke pigmentation of humpback whale *Megaptera novaeangliae* populations worldwide 1–7

Eggleston DB
Recruitment in Nassau grouper *Epinephelus striatus*: post-settlement abundance, microhabitat features, and ontogenetic habitat shifts 9–22

Uiblein F
Morphological variability between populations of *Neobythites stefanovi* (Pisces: Ophidiidae) from the deep Red Sea and the Gulf of Aden 23–29

Carr MH, Hixon MA
Predation effects on early post-settlement survivorship of coral-reef fishes 31–42

Burkholder JM, Glasgow HB Jr, Hobbs CW
Fish kills linked to a toxic ambush-predator dinoflagellate: distribution and environmental conditions 43–61

Olesen NJ
Clearance potential of jellyfish *Aurelia aurita*, and predation impact on zooplankton in a shallow cove 63–72

Nigmatullin CM, Arkhipkin AI, Sabirov RM
Age, growth and reproductive biology of diamond-shaped squid *Thysanoteuthis rhombus* (Oegopsida: Thysanoteuthidae) 73–87

Williams GA, Morritt D
Habitat partitioning and thermal tolerance in a tropical limpet, *Cellana grata* 89–103

Hunt HL, Scheibling RE
Structure and dynamics of mussel patches in tidepools on a rocky shore in Nova Scotia, Canada 105–115

Salkeld PN
Aspects of reproduction associated with the use of a segmented regression to describe the relationship between body weight and shell length of *Mytilus edulis* 117–128

Brown CL, Luoma SN
Use of the euryhaline bivalve *Potamocorbula amurensis* as a biosentinel species to assess trace metal contamination in San Francisco Bay 129–142

Rouleau C, Pelletier E, Tjälve H
Distribution kinetics of trophic single doses of methylmercury, tributyltin, and corresponding inorganic ions in the starfish *Leptasterias polaris* 143–158

Uriz MJ, Turon X, Becerro MA, Galera J, Lozano J
Patterns of resource allocation to somatic, defensive, and reproductive functions in the Mediterranean encrusting sponge *Crambe crambe* (Demospongiae, Poecilosclerida) 159–170

Anthony KRN, Svane I
Effects of substratum instability on locomotion and pedal laceration in *Metridium senile* (Anthozoa: Actiniaria) 171–180

Frank U, Brickner I, Rinkevich B, Loya Y, Bak RPM, Achituv Y, Ilan M
Allogeneic and xenogeneic interactions in reef-building corals may induce tissue growth without calcification 181–188

Staunton Smith J, Johnson CR
Nutrient inputs from seabirds and humans on a populated coral cay 189–200

Preen A
Impacts of dugong foraging on seagrass habitats: observational and experimental evidence for cultivation grazing 201–213

Vermaat JE, Agawin NSR, Duarte CM, Fortes MD, Marbà N, Uri JS
Meadow maintenance, growth and productivity of a mixed Philippine seagrass bed 215–225

Schuster S, Herndl GJ
Formation and significance of transparent exopolymeric particles in the northern Adriatic Sea 227–236

Tester PA, Geesey ME, Guo C, Paerl HW, Millie DF
Evaluating phytoplankton dynamics in the Newport River estuary (North Carolina, USA) by HPLC-derived pigment profiles 237–245

Bustillos-Guzmán J, Claustre H, Marty JC
Specific phytoplankton signatures and their relationship to hydrographic conditions in the coastal northwestern Mediterranean Sea 247–258

Berges JA, Cochlan WP, Harrison PJ
Laboratory and field responses of algal nitrate reductase to diel periodicity in irradiance, nitrate exhaustion, and the presence of ammonium 259–269

Doering PH, Oviatt CA, Nowicki BL, Klos EG, Reed LW
Phosphorus and nitrogen limitation of primary production in a simulated estuarine gradient 271–287

Slawyk G, Raimbault P
Simple procedure for simultaneous recovery of dissolved inorganic and organic nitrogen in ^{15}N-tracer experiments and improving the isotopic mass balance 289–299

NOTES

Miron G, Boudreau B, Bourget E
Use of larval supply in benthic ecology: testing correlations between larval supply and larval ssettlement 301–305

France RL
Carbon-13 enrichment in benthic compared to planktonic algae: foodweb implications 307–312

MARINE ECOLOGY PROGRESS SERIES

HISTORY: Marine Ecology Progress Series (MEPS) was established in response to requests from numerous marine ecologists from all over the world. When founded, MEPS was based on 'Marine Ecology' – the first comprehensive, integrated treatise on life in oceans and coastal waters – conceived, organized and edited by Professor Otto Kinne, and published by John Wiley & Sons.

AIM: MEPS serves as a world-wide forum for all aspects of marine ecology, fundamental and applied. The journal covers: microbiology, botany, zoology, ecosystem research, biological oceanography, ecological aspects of fisheries and aquaculture, pollution, environmental protection, conservation, resource management.
Ecological research has become of paramount importance for man's future. The information presented here should, therefore, encourage critical application of ecological knowledge for the benefit of mankind and, in fact, of life on earth. Marine Ecology Progress Series has received recognition as the leader in its field. The journal strives for

- complete coverage of the field of marine ecology
- the highest possible quality of scientific contributions
- quick publication
- a high technical standard of presentation.

SCOPE: MEPS is international and interdisciplinary. It presents rigorously refereed and carefully selected research articles, reviews and notes, as well as comments, concerned with:

Environmental Factors: Tolerances and responses of marine organisms (microorganisms, autotrophic plants, and animals) to variations in abiotic and biotic components of their environment; radioecology.

Physiological Mechanisms: Synthesis and transversion of organic material (mechanisms of auto- and heterotrophy); thermo-, ion-, osmo- and volume-regulation; stress resistance; non-genetic and genetic adaptation; population genetics; orientation in space and time; migrations; behavior; molecular basis of ecological processes.

Cultivation: Maintenance and rearing of, as well as experimentation with, marine organisms under environmental and nutritional conditions which are, to a considerable degree, controlled; analysis of the physiological and ecological potential of individuals, populations and species; determination of nutritional requirements; ecological aspects of aquaculture; water-quality management; culture technology.

Dynamics: Production, transformation, and decomposition of organic matter; flow patterns of energy and matter as these pass through organisms, populations and ecosystems; biodiversity; variability of ecosystem components; trophic interrelations; population dynamics; plankton ecology; benthos ecology; estuarine and coastal ecology; wadden-sea ecology; coral reef ecology; deep-sea ecology; open-ocean ecology; polar ecology; theoretical ecology; ecological methodology; ecological modelling and computer simulation.

Ocean Management: Human-caused impacts: their role as modifiers and deformers of living systems, their biological consequences and their management and control; inventory of living resources in coastal areas, estuaries and open oceans; ecological aspects of fisheries; pollution of marine areas and organisms; protection of life in the seas; management of populations, species and ecosystems; management of coastal zones and sea areas; biotechnology.

Scientific publications appearing in this journal have been rigorously refereed, carefully quality-improved, and professionally selected by our editorial staff. These publications, and all parts thereof, are protected by copyright. This covers the exclusive rights of the publisher to *reproduce* (by any means, including photographic or electronic), to *distribute* (including via photocopies, reprints, or electronic means), and to *store* on microfilm, in electronic data bases, on video disks, etc., this material. The acceptance regulations of a manuscript for publication automatically include the consent of the author(s) to transfer the copyright to the publisher. Permission for exceptions to these rules must be obtained in writing from the publisher at the time of manuscript submission.
In the USA, photocopies may be made for personal or in-house use beyond the limitations stipulated under Section 107 or 108 of U.S. Copyright Law, provided a fee (US $3.00 per article) is paid to the Copyright Clearance Center, Inc., 21 Congress Street, Salem, MA 01970, USA.

Publisher, editors and authors do not accept legal responsibility for errors, omissions or claims, nor do they provide any warranty, express or implied, with respect to information published in MEPS.

Tables of contents and *tables of contents with abstracts* for MEPS are available free of charge on the Internet via World Wide Web (http://www.int-res.com/int-res).
